

The modular rear carrier system

English

Freedom, on the move

Swivel-carrier

The system starts with a swivel-carrier mounted to the vehicle chassis. Two sturdy support arms carry the load. When the system is not in use, the arms stow behind a cover.

Our accessories include a lightweight bike carrier, a spacious weather-resistant luggage box and a motorcycle carrier. The rear lights connect automatically when the modules are fitted.

The carrier swings open through 90°, giving easy access to the rear doors. Even fully loaded, it can be moved with one hand, complete with all its accessories.

Fully modular. Every single day.

Change your modules in just two minutes.

The complete system

1. Carry - Bike carrier

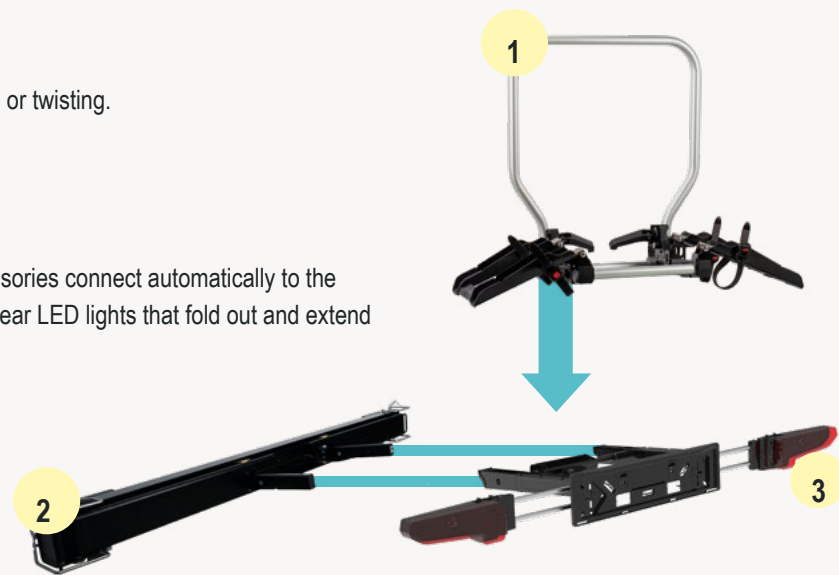

Set it in place, raise the retaining frame, lock it and go. With up to 35 kg per bike, it has room for heavier bikes too. The wheel rails fit all standard bicycles.

2. Swivel-carrier - integrated rear carrier

Your luggage stays secure: no swaying, swinging or twisting.

3. Base - accessory mount

No more connecting sockets by hand: your accessories connect automatically to the vehicle electronics. Compact when stowed, with rear LED lights that fold out and extend when needed.

Towbar

Detachable towbar

A towbar is also available for many vehicle variants.

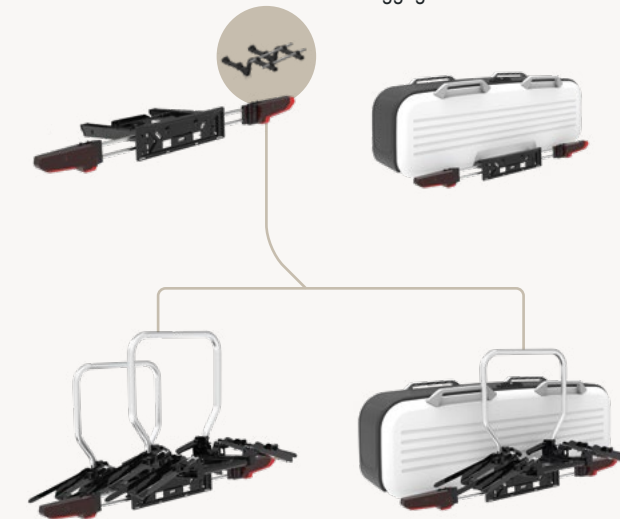

Optional accessories

Base XT

Extension kit

Box

Luggage box

Combinations

Swivel-carrier

The system starts with a swivel-carrier mounted to the vehicle chassis. Two sturdy support arms carry the load. When the system is not in use, the arms stow behind a cover.

Our accessories include a lightweight bike carrier, a spacious weather-resistant luggage box and a motorcycle carrier. The rear lights connect automatically when the modules are fitted.

The carrier swings open through 90°, giving easy access to the rear doors. Even fully loaded, it can be moved with one hand, complete with all its accessories.

Highlights

- Swings open through 90°
- Maximum load capacity: 150 kg
- Load supported on two arms
- Interchangeable modules for bikes, boxes, scooters and small motorcycles

Base

Set it on, and everything clicks into place. Base is the smart foundation for your Minnid accessories: just 9 kg, yet sturdy and lockable. Slide it onto the two support arms and lock it. The vehicle electronics connect automatically, with no separate plug to handle.

The integrated LED rear lights fold out and extend. Dynamic indicators add style and keep your vehicle visible, even with a heavy load.

With the lighting on Base, Carry and Box need no rear lights of their own. That saves space, weight and resources, and keeps storage tidier.

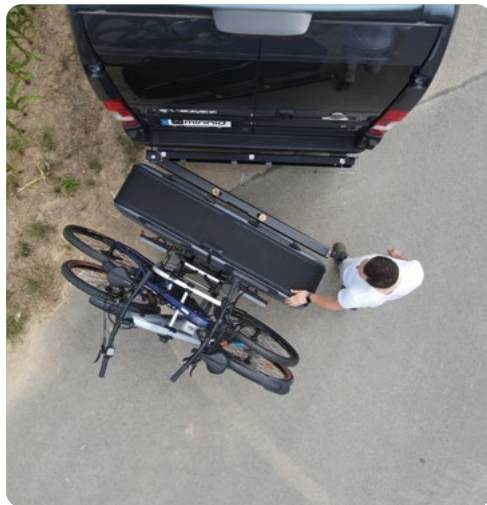

More than an accessory mount

Highlights

- Quick-release fastening
- Automatic connection to vehicle electronics
- Just 9 kg
- Fold-out, extendable LED rear lights with dynamic indicators
- Lockable

Carry

Load your bikes and let freedom begin. Carry is for anyone who wants to take more along, securely and without wobble. Place it on Base or Base XT, raise the frame and lock it. The integrated connection in Base means no loose cables to manage.

Two support arms keep it steady: no swaying, swinging or twisting, even on demanding terrain. One Carry takes two e-bikes weighing up to 35 kg each. Combine two Carrys for up to four bikes.

E-bike, mountain bike or city bike: Carry brings them all.

Highlights

- Quick installation
- Stable on two support arms
- Rails for all common bicycles
- Two bikes: 35 kg each
- Add a second Carry for up to four bikes
- Slim design, compact storage
- Just 11 kg
- Lockable

Luggage box

When your vehicle runs out of room, Box steps in. With 320 litres and up to 72 kg of payload, it carries what no longer fits inside. Set it on Base, lock it and you're ready.

Camping gear, snowboards and more stay safely protected. Combine Box with Carry or a second box when you want to take more along.

Optional Flyouts add length: two fold-out fabric extensions, each providing an extra 15 cm. Ideal for skis, snowboards and longer equipment. Your storage grows with the adventure.

Also available with a practical rain cover

Highlights

- Stable on two support arms
- 320 litres and 72 kg payload with one box
- Just 19 kg
- Lockable
- Weather-resistant: convertible-roof fabric frame, tough plastic fronts
- Combine with Carry or a second box
- External dimensions (W x D x H): 166 x 43 x 56 cm

Base extension - XT

More possibilities on the same foundation. Base XT extends your accessory mount so you can combine two Minnid accessories: two Carrys, Carry and Box, or two boxes.

The slim system installs quickly and weighs 9 kg in total. A 4 kg section remains permanently bolted on; the second, 5 kg section is removable.

The fixed section reduces the listed payloads of Base, Carry and Box by 4 kg. Refer to the payload table for each combination.

Highlights

- Accessory mount extension
- Combines two Minnid accessories
- High payload capacity
- Quick installation
- 9 kg: 4 kg fixed, 5 kg removable
- Slim design

Carry MB motorcycle rail

Four wheels are good. Sometimes two are enough. With Carry MB, your scooter or small motorcycle comes along easily, without a trailer or the stress.

Slide the motorcycle rail onto the Minnid carrier. Your two-wheeler is ready for the next trip into the village, along the coast or to the bakery in the morning.

Compact, simple and clever: bring your scooter and make your camping trip even more versatile.

Also fits wide tyres up to 120 mm

Highlights

- Up to 130 kg payload
- No additional Base required
- Adjustable tyre width
- Quick, tool-free installation
- 25 kg unladen weight
- Choose tie-down points along the airline track
- Loading ramp included

Payload table

Make planning easy: we've done the calculations. Which configuration suits your vehicle, and how much can you load?

The table gives you an at-a-glance guide to unladen weights and permitted payloads for accessories and combinations. Plan calmly and load safely.

One look, and you're ready to load.

Current list of compatible vehicles

[Minnid.com/Fahrzeuge](https://minnid.com/Fahrzeuge)

Accessories and combinations	Unladen weight incl. accessories	Max. payload	Notes
Swivel-carrier	55 kg	150 kg	Weight varies slightly with the vehicle mounting.
Base / Base Light	9 kg		Includes the weight of accessories.
Carry	11 kg	70 kg	Maximum 35 kg per bike.
Box	19 kg	72 kg	Keep the load's centre of gravity as central as possible.
Base XT	4 kg + 5 kg = 9 kg	75 kg	4 kg fixed, 5 kg removable. The stated payloads for Base, Carry and Box are reduced by 4 kg.
Carry + Carry (Base + XT)	40 kg	110 kg	Maximum 64 kg on the Carry fitted to Base XT.
Box + Carry (Base + XT)	48 kg	102 kg	Carry on Base XT: max. 64 kg. Box on Base XT: max. 56 kg.
Carry MB	25 kg	130 kg	Includes loading ramp (+5 kg). No additional Base required.

Place heavier accessories closer to the vehicle to avoid excessive rear loading.

A little about us

Built in the Alps. Driven by adventure.

We are Minnid: at home in Bad Homburg, with roots in the Zillertal, where our production is based. Here, where the mountains call and the roads rarely run straight, we develop rear carrier systems for people who feel at home on the move.

Our motivation is to give you more room for freedom. For bikes, boards, scooters and everything you want to bring when you head out to discover somewhere new.

By the sea, in the mountains or on endless country roads: Minnid stands for thoughtful design, uncompromising quality and maximum flexibility.

You bring the spirit of adventure. We'll take care of the rest.
